

BLM Redding Field Office Research Specimen Collection Permit Stipulations

1. Collecting should be limited to plant parts whenever possible.
2. Collecting shall be kept to the minimum necessary.
3. Collecting shall be limited to those populations of sufficient size and vigor to be minimally impacted by such activity.
4. You shall enter into a Memorandum of Understanding with the California Department of Fish and Wildlife prior to collecting any State-listed rare, threatened, or endangered plants.
5. You shall provide the Bureau of Land Management with a report stating which plants were collected on BLM lands during the duration of the permit and their disposition (including herbarium or herbaria where deposited, greenhouse or garden for any living progeny, and collection and/or accession number). This progress report should be sent to Laura Brodhead, BLM Redding Field Office Ecologist.
8. This authorization applies only to public lands (i.e., lands administered by the BLM) within The Redding field Office. Collection on other Federal lands, including National Forests, National Parks or Preserves, National Wildlife Refuges, or lands managed by the military, will require separate authorization from the managing agency.
9. If collecting species that are Federally listed, the collectors must also hold a section 10 (a)(1)(A) permit from the US Fish and Wildlife Service for those species.
10. You must have a copy of this Permit with you at the time you are undertaking collection activities on BLM lands, along with proof of identification.
