

General Special Conditions for Special Use Permit 81620-21-003

- Contact and coordinate sample collection plans with refuge staff at Sacramento National Wildlife Refuge Complex **48 hours prior to visit** or series of visits –refuge units, sampling sites, and access routes to be pre-determined to avoid conflicts with other projects/programs
- While on the refuge, display a copy of the Special Use Permit on dashboards of all vehicles at all times
- Access to monitoring sites via specific routes determined by consultation with refuge staff.
- Maintain regular communication and coordination with refuge staff regarding monitoring locations.
- Use of refuge is permitted only for authorized purposes
- All monitoring sites must be clearly marked and communicated to refuge staff
- Vehicle travel restricted to roads and levees unless other arrangements have been coordinated with refuge staff
- Vehicles will be parked only in mowed or graveled areas to minimize fire hazard.
- Speed limit on refuge is 25 mph, unless otherwise posted
- Leave gates as found
- Maintain all sites clean and orderly, no dumping, burying or leaving refuse is permitted
- Line keys to be returned after investigation completion
- Provide Refuge Manager or Supervisory Biologist with regular progress and final reports
